XUNTA DE GALICIA

galician tunes

Womex09

One of the main aims of the new Galician Government is to promote Galician Culture abroad. Internationalization is a key strategy for our cultural companies, especially the music companies. That is the reason which led our Government to create Galician Tunes. Galician Tunes is the definite trademark for Galician Music abroad. It is a project with a group of enthusiastic people working hand-and-hand with Galician music companies and associations. It has brought Galician Music industry to every corner of the World through the participation in different European International Markets like WOMEX, Midem or Popkomm.

Galician Tunes is also a website dedicated to promoting Galician musical culture. The web offers a selection of tracks and a complete directory of Galician music resources that includes artists, companies, festivals, professional associations, organisations and official music circuits. The web is ready to take a step beyond and become the definite tool for our companies in their further internationalization.
